

Bug ID	Module	Title	Steps	Expected	Actual	Severity	Screenshots	Status
BUG_001	Sign Up	Weak Password Accepted During Registration	1. Open Register page 2. Enter valid First Name, Last Name, and Email 3. Enter weak password "12345" 4. Click CREATE button	System should reject weak password and display proper password strength validation message	System accepted weak password "12345" and created account successfully	Critical		Open
BUG_002	Sign Up	Incorrect Password Length Validation	1. Open Register page 2. Enter password greater than 8 characters 3. Click CREATE button	System should restrict password length according to defined requirement and display proper validation message	System allowed password up to 40 characters and displayed message "Password is too long (maximum is 40 characters)" instead of restricting to expected limit	High		Open
BUG_003	Sign Up	Password Visibility Toggle Icon Missing	1. Open Register page 2. Navigate to Password field 3. Check for show/hide password visibility option	Password field should contain visibility toggle icon to show or hide entered password	Password field does not contain show/hide password visibility icon functionality	Medium		Open
BUG_004	Sign Up	Password Less Than 8 Characters Accepted	1. Open Register page 2. Enter password less than 8 characters such as "12345" 3. Fill remaining required details 4. Click CREATE button	System should reject password less than 8 characters and display validation message	System accepted password less than 8 characters and account creation proceeded successfully	Critical		Open
BUG_005	Sign Up	Special Characters Accepted in Name Fields	1. Open Register page 2. Enter special characters in First Name and Last Name fields such as "@Pallavi#" and "\$Bunkar!" 3. Fill remaining details 4. Click CREATE button	System should restrict invalid special characters in name fields and display proper validation message	System accepted special characters in First Name and Last Name fields without displaying validation message	Medium		Open
BUG_006	Sign Up	Numeric Values Accepted in Name Fields	1. Open Register page 2. Enter numeric values in First Name and Last Name fields such as "12345" and "344556" 3. Fill remaining details 4. Click CREATE button	System should reject numeric values in name fields and display proper validation message	System accepted numeric values in First Name and Last Name fields without displaying validation message	Medium		Open
BUG_007	Sign Up	Excessive Character Input Accepted Without Validation	1. Open Register page 2. Enter long input in First Name field such as "Pallavi" 3. Enter long input in Last Name field such as "Bunkar" 4. Enter long input in Email Address field such as "pallaviaryyaaaaaaaaaaaaaaaaaaaaaaaaa@gmail.commmmmmmmmmm" 5. Enter long password such as "Test@12345678910111213141516171819202122232425" 6. Click CREATE button	System should restrict additional characters or display proper validation message without breaking UI	System accepted excessive character input without validation and allowed form submission successfully	Medium		Open
BUG_008	Login	Incorrect Validation Message for Empty Login Fields	1. Open Login page 2. Leave Email and Password fields blank 3. Click Login button	System should display mandatory validation messages such as "Email field should not be empty" and "Password field should not be empty"	System displayed generic "Incorrect email or password" message instead of mandatory field validation messages for empty fields	High		Open
BUG_009	Login	Inconsistent Login Terminology in UI	1. Open Login page 2. Observe page title, navigation menu, and login button text	System should maintain consistent terminology across the UI such as using either "Login" or "Sign In" uniformly	Navigation menu displayed "Log In" while submit button displayed "SIGN IN", causing inconsistent UI terminology and poor user experience	Low		Open
BUG_010	Login	Login Fields Not Cleared After Logout	1. Login with valid credentials 2. Logout from application 3. Observe Login page fields after redirection	System should redirect user to Login page and Email Address & Password fields should be empty	System redirected user to Login page successfully but previously entered Email Address and Password fields were still populated	Medium		Open
BUG_011	Reset Password	Password Reset Successful Even When Password Confirmation Does Not Match	1. Open Reset Password page 2. Enter "pallavi123" in Password field 3. Enter "pallaviiiiilllllll" in Password Confirmation field 4. Click Reset/Submit button	System should restrict password reset and display validation message indicating Password and Password Confirmation fields do not match	System updated password successfully even though Password and Password Confirmation fields did not match and no validation message was displayed	High		Open
BUG_012	Reset Password	Generic Error Message Displayed for Reused Reset Password Link	1. Open reset password email 2. Click "Reset your password" link 3. Change password successfully 4. Open same email again 5. Click same reset password link again 6. Attempt password reset again	System should restrict reuse of reset password link and display proper expired/invalid link message	System restricted reuse of reset password link successfully, but displayed generic error message "Password reset error." instead of proper expired/invalid link message	Medium		Open
BUG_013	Login	Account Not Locked After Multiple Invalid Login Attempts	1. Enter incorrect password 4-5 times continuously for same account 2. Enter correct password 3. Click SIGN IN	System should temporarily lock/restrict account after multiple failed login attempts and should not allow login until lock duration expires	System did not lock/restrict account after multiple invalid login attempts and allowed user to login successfully using correct credentials	High		Open

BUG_014	Cart Functionality	Cart Products Not Displayed Immediately After Add to Cart	1. Open product detail page 2. Click "ADD TO CART" button 3. Immediately click "My Cart" option without refreshing page	System should display added cart products immediately without loading issue or manual page refresh	System displayed continuous loading screen instead of cart products after clicking My Cart. Products became visible only after manually refreshing the page	High		Open
BUG_015	Home Page	Duplicate and Non-Functional Search Options in Header	1. Open homepage 2. Observe header section 3. Observe search icon search field and "Search" navigation option 4. Click "Search" navigation option	Application should maintain clear and consistent search functionality and Search navigation should work properly	Homepage displayed two separate search options — one search field with search icon and another "Search" navigation option, causing confusing functionality. Additionally, Search navigation option was not working properly	Medium		Open
BUG_016	Product Listing / Category Page	Incorrect Product Color Variant Display	1. Open "Black heels" product page 2. Change Size option from "M" to another value 3. Observe Color dropdown values and product image	Product details, image, size, and color variants should match correctly with selected product	Size dropdown functionality worked successfully, but Color dropdown displayed incorrect value "Red" while the product image and product name showed "Black heels"	High		Open
BUG_017	Product Listing / Category Page	Product Color Dropdown Selection Not Working Properly	1. Open "Noir jacket" product page 2. Change Size option 3. Change Color option	Selected size and color should reflect correctly for the selected product	Size dropdown worked successfully, but Color dropdown selection did not work properly and selected color was not reflected correctly	High		Open
BUG_018	Product Listing / Category Page	Breadcrumb Displays Technical Label Instead of User-Friendly Category Name	1. Go to home page then open any product page 2. Observe breadcrumb navigation	Breadcrumb should display meaningful product/category names understandable to users	Breadcrumb displayed technical/internal label "Frontpage" instead of proper category name, causing confusing user experience	Medium		Open
BUG_019	Search Functionality	Improper Validation Handling for Empty Search Input	1. Open homepage 2. Keep Search field blank 3. Press Enter/Search	System should display validation message or restrict empty search submission	System redirected user to Search Results page and displayed message "No search performed. If you are looking for something, please try our homepage" instead of proper validation message	Medium		Open
BUG_020	Search Functionality	Duplicate and Non-Functional Search Options in Header	1. Open homepage 2. Observe search icon search field and "Search" navigation button in header 3. Click "Search" navigation button	Application should maintain a single clear search functionality and Search navigation button should work properly	Application displayed two separate search options — one search field with search icon and another "Search" navigation button, causing confusing user experience. Additionally, clicking "Search" navigation button did not perform any action	High		Open
BUG_021	Cart Functionality	Duplicate Product Names and Missing Variant Details in Cart	1. Add products to cart 2. Open Cart page 3. Observe product image, product name, size, color, quantity, and price	Correct product name, size, color, quantity, and price should display properly without duplicate values	Some products displayed repeated product names such as "Grey jacket - Grey jacket - Grey jacket" and products without size/color variants did not display proper variant information consistently	High		Open
BUG_022	Cart Functionality	Cart Loading Issue After Clicking My Cart	1. Add product to cart 2. Immediately click "My Cart"	Cart page should load products properly without infinite loading	Application displayed loading icon continuously and cart products were not visible until page refresh	High		Open
BUG_023	Checkout Flow	Duplicate Product Names Displayed in Checkout Page	1. Open Checkout page 2. Observe product names	Product names should display correctly without duplicate values	Product names displayed repeatedly such as "Grey jacket - Grey jacket" causing incorrect product detail display	Medium		Open
